

September 2015

The Quest for Alpha

**An Analysis of the Performances of Collective Investments:
Actively-managed Equity Funds versus Benchmarks**

Quarter ended September 2015

DRW Investment Research

1. Outperformance

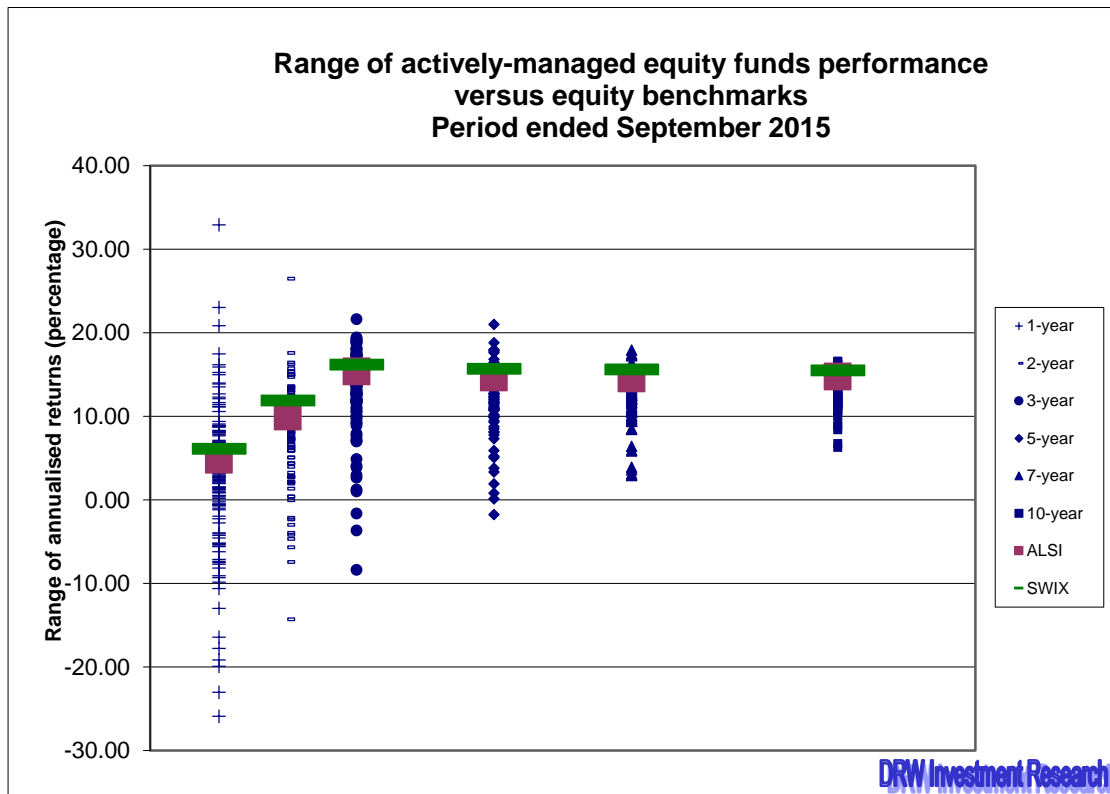

- 1) Only actively-managed equity funds are evaluated, thus index-tracker or passively-managed equity funds are excluded from the analysis.
- 2) The analysis does not account for *survivorship bias*, i.e. the performances of funds that ceased to exist in its original format or name are not part of the current performance database. Typically, such an exclusion of terminated funds inflates the averages of fund performances over time.
- 3) The performance data were collected from the *Morningstar* fund performance database for the quarter ended **30 September 2015** and were gratefully supplied by *Nedgroup Investments*.
- 4) The annualised returns for 2-year, 3-year, 5-year, 7-year and 10-year holding periods are shown.
- 5) The Total Return Indices (dividends re-invested) of the FTSE JSE All Share Index (ALSI) and Shareholder Weighted Index (SWIX) are used as equity performance benchmarks.
